# prof. argireline

- **Keywords:** Anti-Wrinkle, Expression Lines, Natural Botox Effect

The ampoules of Argireline are an efficient anti-wrinkle which prevents and reduces expression lines. Creates a natural botox effect on the skin.

mccosmetics<sup>®</sup>  
NY

## product information

**main characteristics & effects**

Prevents dynamic wrinkles from forming, interferes with a protein receptor complex which helps cause muscle movement- less muscle contractions result in less wrinkles; also stimulate collagen production and helps the skin retain moisture

**recommended for**

Anti-Wrinkle, Expression Lines, Natural Botox Effect

**usage**

Can be used topically, transdermal with virtual mesotherapy (iontophoresis or electroporation), with RadioFrequency or ultrasound, with micro-needling (derma-Roller or dermapen) and also with traditional mesotherapy.

**application**

**Treatment frequency:**  
Every 2 weeks  
(approx. 5-8sessions)  
**Maintenance treatment:**  
1 session every 1-2 months

# prof. biotin hidrixin

**application areas**

- face & hair

• **Keywords:**

Biotin contains ingredients that help stimulate cell repair, resulting in an overall improvement of the skin structure and appearance. The acceleration of the lipid synthesis strengthens the skin's natural barrier providing a significant wrinkle-reducing power. It has a regulatory effect on the sebaceous secretion, relieves symptoms of seborrheic dermatitis, eczemas and dry skin and also helps prevent hair loss.

## product information

**main characteristics & effects**

anti- seborrheic activity; improves the skin's natural barrier function; is necessary for cell growth, production of fatty acids and for metabolizing fats and amino acids.

**recommended for**

Regulate Sebum Production, Oily Skin, promote healthy skin cell and tissue growth.

**usage**

Can be used topically, transdermal with virtual mesotherapy (iontophoresis or electroporation), with RadioFrequency or ultrasound, with micro-needling (derma-Roller or dermapen) and also with traditional mesotherapy.

**application**

# prof. l-carnitine

- **Keywords:** Weight Control, Burn Fat, Cellulite

Hyaluronidase liquid contains ingredients that act as diffuser agents in the elimination of water retention and adipocytes. It increases the permeability of connective tissue and absorption of fluids.

## product information

**main characteristics & effects**

amino acid derivative that helps transport fatty acids into the mitochondria and burn fat to produce energy.

**recommended for**

Weight Control, Burn Fat, Cellulite

**usage**

Can be used topically, transdermal with virtual mesotherapy (iontophoresis or electroporation), with RadioFrequency, ultrasound, with microneedling (dermapen or derma-Roller) and with other mesotherapy procedures.

**application**

**Treatment frequency:**  
Every 2 weeks  
(approx. 6–10 sessions)  
**Maintenance treatment:**  
1 session every 3 months

# peelings

## sali\_cylic 30 ml

### DESCRIPTION

Salicylic, a beta hydroxyl acid, is a superficial peeling and a keratolytic agent which enhances the epidermis and renews the skin. It improves the look of pro-acneic skin, clears spots, revitalizes and gives a glow to aged skin.

### ACTIVE INGREDIENTS

Salicylic Acid

### RECOMMENDED FOR

Acne-prone skin, Very oily skin, Blocked follicles

## salicylic 30 ml

### DESCRIPTION

It is indicated for oily skin, prone to acne, blocked follicles and reduction of wrinkles. The active ingredients of the salicylic acid improve the look of blemished and aged skin. With exfoliating, anti-inflammatory, anti-acne and anti-aging properties, it accelerates the removal of dead cells and renews the skin, resulting in visible skin rejuvenation.

Post-peeling 50 ml - A solution that neutralizes the peeling effect, restoring the pH of the skin and that provides a sensation of comfort and coolness.

### ACTIVE INGREDIENTS

Salicylic Acid

### RECOMMENDED FOR

Acne-prone skin, Very oily skin, Blocked follicles

## azelaic 30 ml

### DESCRIPTION

Developed for the treatment of acne and cutaneous hyperpigmentation, the active principles of Azelaic Acid contain bacteriostatic properties and exhibit an inhibitory effect on tyrosinase production, reducing melanin synthesis.

Post-peeling 50 ml - A solution that neutralizes the peeling effect, restoring the pH of the skin and that provides a sensation of comfort and coolness.

### ACTIVE INGREDIENTS

Azelaic Acid

### RECOMMENDED FOR

Acne, Hyperpigmentation, Rosacea, Sensitive skin

## mandelic 30 ml

### DESCRIPTION

It is suitable for aging skin, wrinkles and spots. The active ingredients of the mandelic acid break down the intracellular links, stimulate collagen synthesis and cell regeneration. It has a bacteriostatic effect that regulates blemished, oily and acneic skin. It inhibits the synthesis of melanin and helps renew skin damaged by sun exposure. The mandelic acid is suitable for sensitive and dark skin.

### ACTIVE INGREDIENTS

Mandelic Acid

### RECOMMENDED FOR

Skin Dryness, Photo-Aging, Wrinkles, Skin Lightening, Skin Flacidity

# peelings

## jessner 30 ml

### DESCRIPTION

It is indicated for scars, skin aging, hyperpigmentation, stretch marks, hands and neck line. Jessner contains active ingredients with antioxidant, purifying, whitening and renewing properties which help reduce sebum production and open clogged sebaceous follicles. They also promote the acne healing process and renew aged and sun damaged skin. The result is a smoother and rejuvenated skin.

Post-peeling 50 ml - A solution that neutralizes the peeling effect, restoring the pH of the skin and that provides a sensation of comfort and coolness.

### ACTIVE INGREDIENTS

Resorcinol

### RECOMMENDED FOR

Wrinkles and scars, Acne, Psoriasis and Eczema, Hyperpigmentation

## lactic 30 ml

### DESCRIPTION

It is indicated for oily skin, prone to acne, blocked follicles and reduction of wrinkles. The active ingredients of the salicylic acid improve the look of blemished and aged skin. With exfoliating, anti-inflammatory, anti-acne and anti-aging properties, it accelerates the removal of dead cells and renews the skin, resulting in visible skin rejuvenation.

Post-peeling 50 ml - A solution that neutralizes the peeling effect, restoring the pH of the skin and that provides a sensation of comfort and coolness.

### ACTIVE INGREDIENTS

Lactic Acid

### RECOMMENDED FOR

Skin Dryness, Photo-aging, Wrinkles, Skin Lightening, Skin Flaccidity

## glycolic 30 ml

### DESCRIPTION

It is indicated for expression wrinkles, photo-aging, cutaneous spots, acne and scars. The active ingredients of the glycolic acid remove the dead cells from the skin surface, stimulating cellular renewal. It leaves the skin with a young, smooth and uniform appearance.

Post-peeling 50 ml - A solution that neutralizes the peeling effect, restoring the pH of the skin and that provides a sensation of comfort and coolness.

### ACTIVE INGREDIENTS

Glycolic Acid

### RECOMMENDED FOR

Acne scar, Deep Wrinkles, Photo-Aging

# peelings

## brightening

50 ml

### DESCRIPTION

The main ingredients of this peel are effective in hyperpigmentation treatments, diminishing spots and blemishes from sun exposure, pregnancy and acne origin. It has a whitening effect, giving the skin a brighter look. Post-peeling 50 ml - A solution that neutralizes the peeling effect, restoring the pH of the skin and that provides a sensation of comfort and coolness.

### ACTIVE INGREDIENTS

Arbutin, Salicylic Acid

### RECOMMENDED FOR

Depigmentation, Blemishes

## gsh

50 ml

### DESCRIPTION

GSH Peeling is a powerful antioxidant which provides the skin with a radiant glow, redefines pores, improves cutaneous hyperpigmentation, reduces melasma, expression lines and wrinkles, eliminating and preventing acne scars. Post-peeling 50 ml - A solution that neutralizes the peeling effect, restoring the pH of the skin and that provides a sensation of comfort and coolness.

### ACTIVE INGREDIENTS

Glutathione

### RECOMMENDED FOR

Hyperpigmentation, Melasma, Wrinkles and expression lines, Acne and scars

## firming

50 ml

### DESCRIPTION

The active principles of Firming Acid with antioxidant properties provide a moisturizing and rejuvenating treatment, working as an excellent lifting effect. Post-peeling 50 ml - A solution that neutralizes the peeling effect, restoring the pH of the skin and that provides a sensation of comfort and coolness.

### ACTIVE INGREDIENTS

Lactic Acid, Dimethylaminoethanol, Bitartate (DMAE)

### RECOMMENDED FOR

Moisturize, Rejuvenate, Lifting effect

# peelings

## renew 50 ml

### DESCRIPTION

The active principles of Renew Acid provide antioxidant properties and help in treatments for skin rejuvenation and photo-aging. Post-peeling 50 ml - A solution that neutralizes the peeling effect, restoring the pH of the skin and that provides a sensation of comfort and coolness.

### ACTIVE INGREDIENTS

Pyruvic Acid, Phytic Acid

### RECOMMENDED FOR

Rejuvenate, Photo-Aging

## ATA 5 x 10 ml

### DESCRIPTION

ATA peeling allows carrying through a surface exfoliation in the most external layers of the skin, activating a biological mechanism that stimulates the cellular renewal and the growth resulting in a healthier and luminous look. Great peeling that corrects imperfections.

### ACTIVE INGREDIENTS

Trichloroacetic Acid

### RECOMMENDED FOR

Pigmentation changes, Expression lines and wrinkles. It increases blood circulation and reduces the pores

## TPRX 5 x 10 ml

### DESCRIPTION

TPRX has a powerful firming action, being very efficient in the treatment of aging / mature skin. Visible results from the first application onwards, mainly in the expression lines. Also recommended in scars recovery as well as stretch marks caused by weight change. The skin becomes smoother and the tone more uniform. It also has a whitening effect on the skin.

### ACTIVE INGREDIENTS

Trichloroacetic acid, Hydrogen peroxide, Kojic acid, Alpha-arbutin

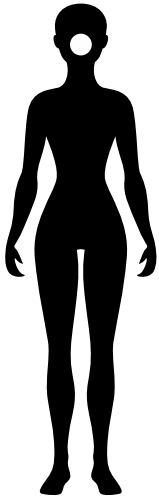

### RECOMMENDED FOR

Anti-aging, Melasma, Healing process
